June Newsletter – Grades I – IV
A sneak peek into our virtual classrooms

As another year at Greenwood High has got well underway, the children have continued to settle into their new classes and it has been wonderful to hear just how hard they are all working. Students of Grades I – IV had a thoroughly wonderful time taking part in various activities conducted this month. We have been really impressed with how well they have approached their learning. We will continue to ensure that our students receive the best of online educational experience. As always, thank you for the continued support you give us every day.

LETTER ART – ENGLISH

Students of Grade I used the FIRST ALPHABET of their names and converted it into LETTER ART.

MY FAVOURITE NUMBER – MATHS

Learning through Fun-Game Time activity, children of Grade I illustrated their favourite numbers in unique ways.

POSTER MAKING- EVS

Children of Grade I learnt the importance of spreading awareness about our environment and different means of protecting it.

YOGA

Yoga Day is celebrated on 21st June every year since 2015. Students of Grade II took this as a challenge and celebrated it with great enthusiasm.

CCA

Birds are a part of nature and feeding nature is nothing but feeding yourself. This month, Grade II students got a hands-on experience making a bird feeder by recycling the waste material at home.

Science - How to keep our environment clean

Everyone loves to stay in a clean and green environment. Students of Grade III brainstormed and showcased their creativity and put in their thoughts on how to keep our environment clean.

Social Science - Family Tree

Students of Grade III were asked to draw/ paste pictures of members of their family starting from their grandparents and to write their names below their pictures. They also had to find out and write their birth dates.

CCA Activity - Regard Before You Discard – Collage making

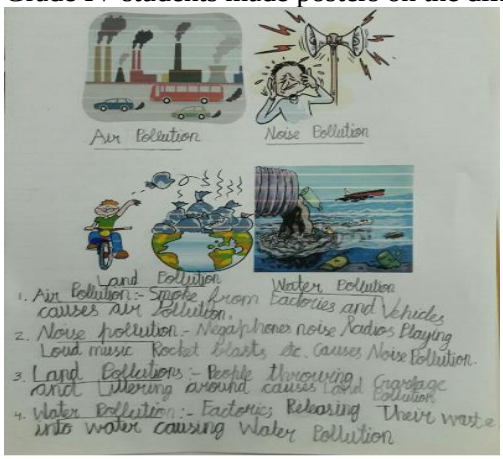
Grade III students were asked to make a beautiful collage out of any waste material available in or around their home on an A4 sheet/ construction paper. This activity helped students to think on ways of reusing everyday materials that will not only reduce the waste but provide them with beautiful output.

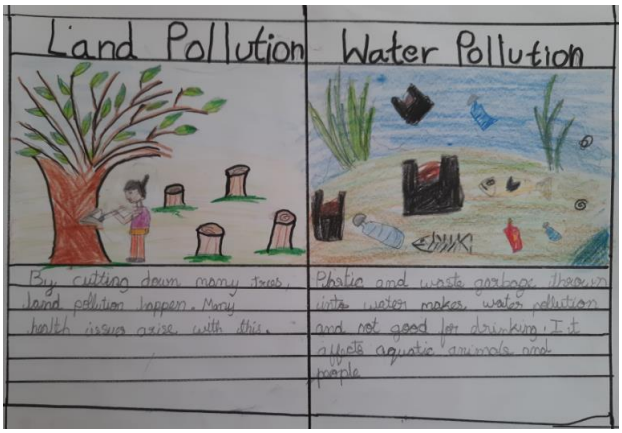
Science - My Healthy Table Mat

It is said that you are what you eat. Today's world seems to leave this concept behind. Junk food is taking the major portion of one's diet. To inculcate a healthy diet routine in our children, an activity of making a table mat was conducted in Grade IV. Students drew healthy food items that they include in their daily diet.

Social Studies – Causes & Effects of Pollution

Grade IV students made posters on the different causes and effects of pollution as a part of their ongoing curriculum.



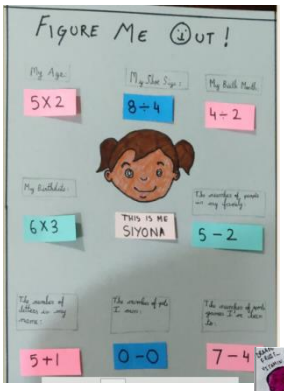


CCA – The Eco Minions

As a part of their first CCA and keeping the World Environment Day in mind, students of Grade IV were all geared up to make badges. The idea behind this activity was to create awareness about our environment and conserving our nature.

Grade 5: The new academic year took off on a great run with Grade 5. This June they were busy as bees with all their activities! In English they were introduced to the evergreen author Ruskin Bond and uploaded videos in which they spoke about their favourite flower and displayed it their classmates, while in Math they created charts with numerical riddles.

to

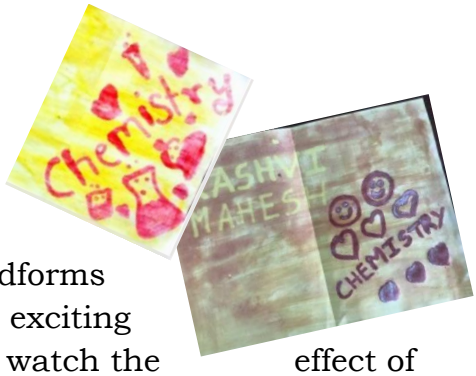


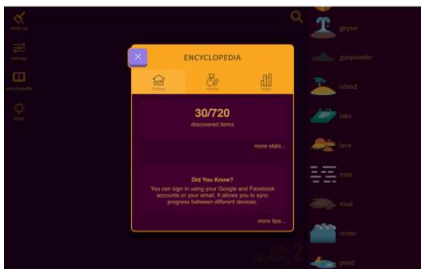
The dawn of humankind is always an exciting topic for students and teachers alike. The students were given an art activity in which they

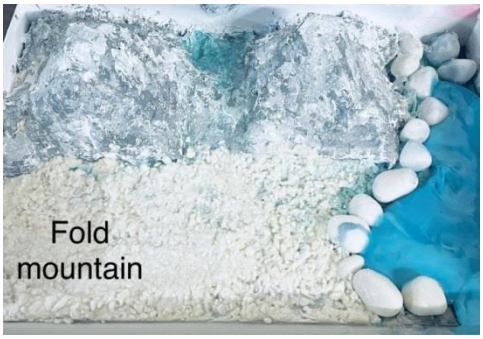
humans. They manners to the mats', table consumer to healthy eating

Two CCA competitions were conducted in June in honour of World Environment Day, for which the students uploaded their sketches of Mother Earth and created ad posters with catchy slogans. Every subject was rife with activities and the students infused a ton of creativity into all of them!

Grade 6: In Grade 6, a number of subjects were explored through hands-on projects. In Chemistry, students played 'Alchemy', an element-creation game, while in Geography they recreated their favourite landforms into 3D models. Yet another exciting activity in Chemistry was to watch the effect of turmeric on household chemicals like washing powder. Two CCA competitions were conducted, in which the students made ad posters with catchy slogans and fashioned beautiful planters (plant pots) out f household materials.



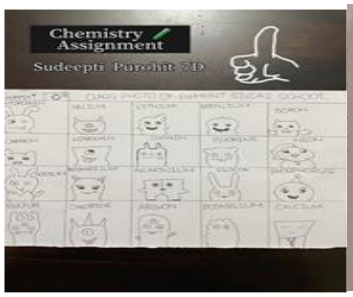


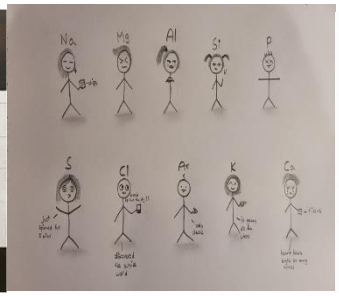


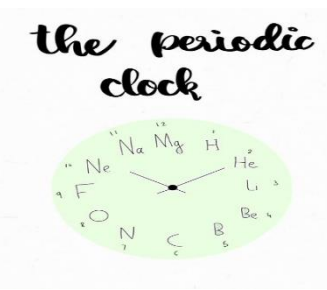
Students of Grade 5 and 6 also observed International Day of Yoga on June 21st and performed Surya Namaskar and other yoga poses as a part of the celebration of the ancient art of well-being.

Grade 7 Learning the Periodic Table can be difficult but when one can draw and illustrate the periodic table using your creative

imagination who would not love to try. The students of grade 7 did an activity on different ways of learning the first few elements of periodic table in sequence.





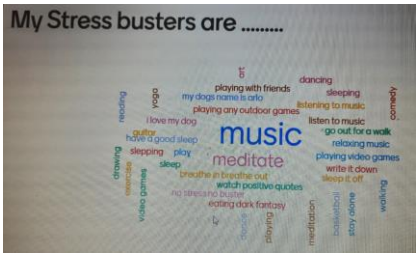


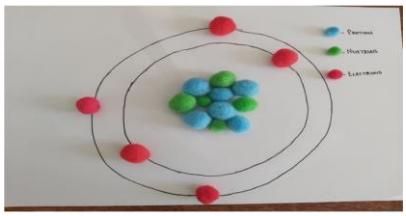
Two CCA competitions were conducted in June in honour of World Environment Day, the students of grades 7 and 8 were asked to design and create a new product using old household items as well as make a bag using their old t-shirt thereby practising - REUSE, RECYCLE and REDUCE.

Grade 8 Eighth graders made density columns, also called the density tower. They used common household liquids to form the liquid layers. Liquids of different densities were also used to demonstrate the concept of floatation and sinking.

Concept of density, floatation and sinking was made simpler with hands-on experiment using lemon, plain water and salt water.

As a part of the study of Endocrine glands, the students of 8 brainstormed on the effects of hormones on teenagers and the resulting stress. They created a word cloud regarding their opinion on ways to overcome stress.



The students of grade 8 made a model of India's physiographic division by using colourful pasta.


Students of Grade 8 had to create atomic model of an element of their choice. They could use recyclable material or waste material at home to construct the model.
