

Early Years Management Newsletter September 2021

This month has been delightful as our babies are progressing well with their skills of learning. The tiny tots were introduced to the 5 sense organs, while learning about **sense of touch** the students gathered different textures of materials for a comparative study through hands on activity. The toddlers enjoyed the story of **"The Gingerbread man"** which inspired them to make their own ginger bread roti. As we learnt about rainy season this month and the babies were thrilled to recreate the image of monsoon through an art activity.

Our little ones are always stoked about participating in hands on activities which encourages not only fun way of learning but also enhances their life skills. The students are so proud of themselves on making their own lemonades. They enjoyed the art activities signifying letter 'Kk' through paper folding and number 4 flower using plastic spoons. We teachers are so proud of the milestones these toddlers are being able to achieve through constant dedication and focused attention.
