

Innovation: Imagine the future and fill in the gaps.

Brian Halligan

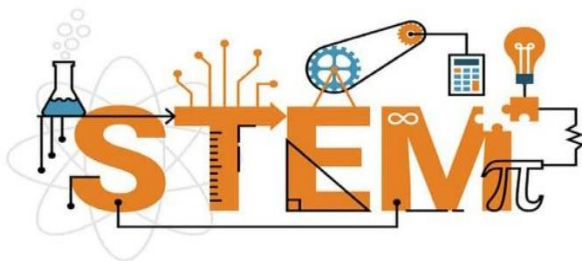

The Covid-19 pandemic has helped the children and the teachers to strike the chords of innovation and learning in many ways. The new ways of learning have involved children at every step and assisted us in multiple micro discoveries for our little ones. Our daily sessions which focus more on learning by doing. The kids have developed tremendously in their reading, writing, identification, oratory, cognitive skills to name a few. The STEM sessions add up glitters to the class and is enjoyed by the enthusiastic parents and children. This month's event 'Rhyme and Rhythm' was a cherry on the cake and the best way to conclude the first semester. Report cards and Parents Teacher Meetings are an integral part of a child's development.

Stay Safe and Stay Healthy 😊
