

## **EY MANAGEMENT LETTER NOVEMBER 2022**

The month of November was a very exciting month for our tiny tots. The month was lined up with innumerable events and activities that left our little ones wanting for more. Our blooming buds went to a Nursery for their fieldtrip to learn all about the plants and flowers. The children were thoroughly entertained by their teachers which made their Children's Day special and memorable. The Tricks from the Magic show also left them gasping in awe.

On the academic front, in EVS, our babies went on a jungle safari and learnt all about wild animals and water animals. Their hands on experience with the Pond Model while learning about Aquatic animals, was priceless. They also learnt about domestic and pet animals. Our little ones turned into little actors when they were asked to imitate the animals they were familiarized with.

In Numeracy, the little ones went star gazing and returned starry eyed when they learnt about the shape Star. They learnt the number value of 6 and showed us how to count with their little fingers. In Literacy, the world of alphabet introduced them to their letters - Nn, Oo, Pp, and Qq. They learnt their phonic sounds and also were introduced to new vocabulary words.

We ended the month with a Thanksgiving celebration and a food sharing activity to inculcate the value of gratitude for all the people and things that bring us joy.

**Regards**
