MANAGEMENT LETTER

CLASS: KG 1

MONTH: NOVEMBER

"What is life without children?

Like a world without the sun, moon and the stars.

They are the little angels of God."

Every child is a miracle with each having their own ways that make this world a beautiful place for us. Children's Day was celebrated with vigour and enthusiasm by the Pre-Primary teachers and students of Greenwood High School. The teachers made the occasion memorable for the children with their special performances. The children were treated to medley of colourful dance performances, fashion show and song by the teachers and a special melodious song performed by Principal sir.

The day commemorated with immense joy, enthusiasm and magnificence. The little angels came dressed up in ethnic clothes and were treated with their favourite snacks. The teachers made Children's Day special for their children

To continue the celebration, a Magic Show was organized on 15th November 2022. The children were mesmerized and fascinated with the enchanting tricks of the magician. The children were overwhelmed and enjoyed the day.

"Children are like buds in a garden and should be carefully and lovingly nurtured, as they are the future of the nation and the citizens of tomorrow."

The month of November was filled with exploring and learning about nature's winged wonders – "BIRDS"! Birds seem to be just about everywhere we look. Children were excited and thrilled to explore the cheerful chirping of birds in the mornings and nesting habits in the spring. Learning birds can be fun too. Kids dived in to learning about the parts of their body, their nesting habits, food & habitats, migration, important facts and even the many species of birds – flight & flightless! In fact, the children enjoyed most species of birds through their characteristics and by listening out for their unique cheeps and tweets.

"Birdwatching is a delightful and the perfect way to spend time outdoors."

A field trip to a "PLANT NURSERY" was organized on Friday, 18th November 2022 to enhance their learning experience on the ongoing EVS topic "BIRDS". Trees and plants are home to birds and hence bringing the children close to nature to explore and experience birdwatching was a great idea.

In Literacy, we learnt about blends "ck, nk, qu, ng". The students were introduced to individual recognition of letters "b, k, p, v", their formation and related vocabulary to

enhance their language skills. We also introduced sight words – "him, her, all, not, are, now, any, for" and learnt to identify these sight words in sentences and use appropriately in a given situation through hands-on activities and role play. We furthered our learning by introducing two & three letter word building with 'o' family words. Children were also introduced to Rhyming words through a fun activity.

In Numeracy, we extended our knowledge of numbers through oral counting from 0-70, number value and writing from 26-30. We learnt the concepts Hot & Cold through activities and games. We introduced the 3D shapes "Cube & Cuboid" through hands-on activities, discussing real life examples and craft activities. Children were also introduced to Making Doubles through hands-on activities and experiential learning.

In Computers, the children were introduced to the use of computers in different places - offices, hotels, restaurants, shopping malls, supermarkets, banks, etc. to name a few through oral discussion and brainstorming.
