KG 2 Management Letter – November 2022

Greetings!

With the month of November beginning, children were looking forward to the most awaited event "The Childrens Day" which began with the fun filled performance by the teachers for their beloved students. Children came dressed in their colorful and gaudy ethnic wear, had a galore of fun and laughter seeing their teacher's performance. The celebrations continued as the children enjoyed the sumptuous meal, popcorn and cotton candy which added more sweetness to their happiness.

Teachers took a great pride in entertaining the children as we never fear spoiling children by making them too happy. Happiness is the atmosphere in which all the good affection grows.

We also had a magic show which enthralled and excited the children with the magicians' tricks. Children were also given an opportunity to be a part of the tricks which exhilarated their spirits.

We went for a field trip to the nursery, where the children had an experiential learning through the understanding of the different plants, their uses and how to care of it. They were glad to see new plants and know their names. As a part of the learning each child was given a takeaway plant to nurture and watch it grow.

On the academic front on the literacy side children are progressing with reading and vocabulary. They can read, write and speak confidently. In numeracy, they started with simple additions which made them understand the relationship between numbers and how quantities relate to one

another. Counting and adding manipulatives help students understand the concepts behind math problems. On the EVS front, children delved into the plant kingdom understanding the edible parts of plant, photosynthesis process and caring of plants. We also had a cleanup drive around the campus to educate about the care and responsibility towards the surroundings.

It gives us great joy and pride in seeing our children progress holistically and grow more responsible each day.

Warm Regards,
