KG 2 Management Letter

November 2023

Greetings!

With the month of November beginning, children were looking forward to the most awaited event "The Childrens Day" which began with the fun filled performance by the teachers for their beloved students. Children came dressed in their colorful and gaudy ethnic wear, had a galore of fun and laughter seeing their teacher's performance. The celebrations continued as the children enjoyed the sumptuous meal, popcorn and cotton candy which added more sweetness to their happiness.

remove "a"

Teachers took a great pride in entertaining the children as we never fear spoiling children by making them too happy. Its rightly said, "Every child is a different kind of flower and they are all beautiful in their own way".

so

It's

put a comma

On the academic front on the literacy side children are progressing with reading and vocabulary. They are able to read, write and speak confidently. In numeracy, they started with simple additions which made them understand the relationship between numbers and how quantities relate to one another. Counting and adding manipulatives help students understand the concepts behind math problems. On the EVS front, children delved into the plant kingdom understanding the edible parts of plant, photosynthesis process and caring of plants. They enjoyed a day where they had snacks with nature.

It gives us great joy and pride in seeing our children progress holistically and grow more responsible each day.

Warm Regards,

KG II Team
